A small printer check

A ruler, one test page and a few settings. No borderless printing required.

1. Print the matching PDF at Actual size / 100%.
2. Measure between the end ticks with a ruler.
3. If the length is wrong, check scale and pages per sheet.

50 mm between end ticks

1 inch × 1 inch

Margin check: the whole rounded frame should be visible.

Use this box to test a gray pencil or crayon before coloring.

Fit may shrink the page. That is fine for coloring, but changes measured lengths.

This is a printer check, not a precision measurement instrument.
